

MOVING electric

Kerala EV D&M Consortium

Considering the immense potential of transforming Kerala into an ecosystem for manufacturing EV components, the Government of Kerala formulated its EV Policy in 2019. The Kerala Development and Innovation Strategic Council (K-DISC) spearheads the project and aims to utilize the state's potential and geographic capability to develop an EV ecosystem in Kerala by forming the Kerala EV Development and Manufacturing Consortium.

Consortium Structure

- **Energy Storage Systems Hub** aims to manufacture electrodes and in near future develop capabilities in manufacturing suitable battery chemistries sustenance for EV in Kerala.
- **Drivetrain Hub** will work with its partners to develop the rare earths available in the beach sands of Kerala.
- **Electronics Hub** focuses on developing capability for building customizable power electronics systems leading to faster EV deployment.
